

Tekscan® Lowers Prices on Pressure Mapping Systems

Tekscan, Inc., a longtime corporate sponsor of the AAPSM, has reduced pricing for “entry-level” pressure mapping systems, *MatScan®* and *F-Scan® Lite*.

MatScan is an easy-to-use screening tool that helps you quickly

- Pinpoint areas of high pressure that may be at increased risk for ulceration
- Assess weight bearing and foot type
- Measure sway as part of a stability evaluation

F-Scan Lite takes plantar pressure assessment to the next level by providing in-shoe information to

- Confirm offloading of high-pressure areas
- Test biomechanical efficacy of orthotics or custom footwear
- Help identify foot pathologies like Charcot foot, functional hallux limitus and equinus

New financing options are also available, so through the end of 2012 you can begin incorporating objective pressure mapping evaluations into your practice for as little as \$99 a month. Plus, thanks to Section 179 of the US Tax Code, you can deduct the full purchase price of these systems if you buy before the end of 2012. Contact *Tekscan* for more information at 617-464-4500 x425 or marketing@tekscan.com, or go to www.tekscan.com/aapsm.
